

Goal 1:

Learn how to create a website.

I'll learn how to make one so that I can build it. To create one, I'll need to learn basic HTML and CSS. Understand responsive design concepts to guarantee that the website looks excellent on multiple devices and screen sizes.

Goal 2:

Create a website that is a blog related to my hobbit which is about manhwa, manga, and anime.

I need to create a website for my final project. To do this, I will select a Domain Name by selecting a unique and memorable domain name for the website. Then, choose a Web Hosting service by selecting a reputable web hosting service. Then, begin adding material to my website. Create pages for various areas such as home, about, and contact, as well as any specific pages connected to your content. Next, integrate multimedia by including photographs, videos, or other multimedia elements to enrich the content of your website. Next, test the website in several browsers to guarantee compatibility and look for any problems. Finally, upload the website.

Goal 3:

Create blogs.

To create a blog the first thing to do is to decide on a topic or niche of the blog. Next is choose a Blogging Platform. Next, Register to a Domain Name. Next, set Up Hosting. Next, Learn the Basics of Content Creation. Next, create the blog. Lastly, Publish Content.
